

NICKELODEON ANIMATION STUDIO - ELECTRICAL MAINTENANCE & FACILITY SUPPORT

The Nickelodeon Animation Studio facility in Burbank, California relies on ongoing electrical infrastructure maintenance and operational support to serve its active production, office, creative, and studio environments. TAFT Electric provides comprehensive electrical maintenance services throughout the property, supporting both interior and exterior electrical systems critical to daily facility operations, employee workspaces, campus safety, and long-term infrastructure reliability.

TAFT Electric's responsibilities include preventative maintenance, troubleshooting, electrical repairs, lighting maintenance, service upgrades, equipment support, and ongoing response to operational electrical needs across the studio campus. Work is performed within active occupied environments requiring careful coordination with facility management, building operations personnel, vendors, and staff to minimize disruptions while maintaining continuous operation of critical building systems.

Additional services include support for interior and exterior lighting systems, electrical distribution equipment, parking lot and site lighting infrastructure, tenant and workspace electrical modifications, emergency service response, and ongoing infrastructure evaluations designed to support system reliability and operational efficiency. Through continued maintenance and service support, TAFT Electric helps ensure the facility's electrical systems remain safe, functional, and responsive to the evolving needs of one of the entertainment industry's leading animation studio campuses.
